EDUCATION

Lagos State University. Ojo
BSc in Computer Science

Lagos, Nigeria
2024 - Present

Skyvision Collegr, Era-Awori
Senior School Leaving Certificate

Lagos, Nigeria
2018 - 2023

EXPERIENCE

Full Stack/ AI Engineer
Freelance and Personal Projects

2024 - Present

Built multiple production-grade web applications across EdTech, E-commerce, AI writing, and SaaS systems using modern full-stack and AI technologies.

- Designed and developed PadiSquare StoreFront, a multi-tenant e-commerce system enabling traders to create and manage storefronts with order tracking, payment workflows, and analytics dashboards using Next.js, React, and FastAPI.
- Developed Inkter, a content publishing platform supporting user-generated posts, search, editing permissions, and admin controls using Django and SQLite.
- Built Reside Hostels, a SaaS accommodation platform for students featuring verified listings, location-based filtering, and landlord communication tools using Next.js, TypeScript, and PostgreSQL.

PROJECTS

PDFfree (AI Book Generation Tool)

2026 - Present

- Built an AI system that converts structured prompts into full-length books with chapters and exportable PDFs.
- Implemented prompt chaining and generation pipelines using LangChain.
- Tech: FastAPI, Python, LangChain

ProdigyAI (EdTech SaaS Platform)

2025 - 2026

- Built a past questions CBT interface with different modes, CBT mode, Quick Test, and Custom Mode.
- Built a full-stack academic productivity system for students to track performance, manage assignments, and collaborate.
- Implemented adaptive scheduling logic and analytics dashboards for learning progress tracking.
- Tech: Django, React, TypeScript, PostgreSQL

TECHNICAL SKILLS

Languages: Python, Typescript, JavaScript and SQL.

Frameworks & Libs: React, NextJS, Tailwind, Django, Fastapi, Flask

AI Tools: LangChain, LangGraph, HuggingFace, Pinecone, OpenAI
